Due to the small amount of sales volume causing the production capacity does not cover fixed cost and the waste control does not meet the specified standard. Also, another important factor is the price of raw materials such as plastic resin, plastic films, colors that continue to rise since Q4/2020. The price of raw material continuously rises by 15-20% while the selling price can increase only 8-10% in accordance with the competition conditions and the sluggish economy. However, the Company can effectively control expenses. At the same time, the Company gain more profit sharing from an associated company which is better than the same period of last year. Future Direction of the Company

For the direction of sales in 2021, during the economic regression all over the country and the world from the Covid-19 pandemic outbreak, The Company will try our best to maintain the sales and operating results not to drop over the previous year. The Company will continue to focus on expanding Flexible Packaging customers into the Rice industry, Pet food industry, because it is a group that the Company has the opportunity to receive an order of sacks, printed sacks or gravure sacks as well, and is a product that is not very complicated.
